

Title: CROSS-POLLINATION OF MULTIPLE SYNC SOURCES  
Inventors: Jason Evan Schleifer et al.  
Filed: February 4, 2004  
Application No.: 10/771,896 Docket No.: 50037.206US01

1/15

*Fig. 1*

3/15

*Fig. 3*

1. SYNC ONE DATA SOURCE

4/15

*Fig. 4*

2. ADD SECOND DATA SOURCE. USER CHOOSES TO CROSS-POLLINATE AT DATA SOURCE CREATION TIME

3. CHANGE ACTIVESYNC SETTINGS: ITEMS CREATED ON DEVICE SYNC TO WORK PC ITEMS FROM WORK PC & HOME PC DO NOT CROSS-POLLINATE

4. CHANGE ACTIVESYNC SETTINGS: ITEMS CREATED ON DEVICE SYNC TO WORK PC ITEMS FROM WORK PC & HOME PC DO NOT CROSS-POLLINATE. CREATE ITEM ON THE HOME PC

5. CHANGE ACTIVESYNC SETTINGS ITEMS CREATED ON DEVICE SYNC TO WORK PC & HOME PC. ITEMS CROSS-POLLINATE WHEN CREATED ON HOME OR WORK PCS CREATE ITEM ON THE WORK PC

6. DELETE HOME PC DATA SOURCE (NOTE ITEM D IS REMOVED FROM THE DEVICE)

6/15

*Fig. 6*

8/15

---

**1. ITEM A HAS ALREADY SYNCED TO THE DEVICE FROM SERVER1**

SERVER1			DEVICE		
ITEM	ServerID	SyncHash	ITEM	Server1-ID	SyncHash
A	SID1	HASH101	A	SID1	HASH101

810

815

---

**2. USER COPIES ITEM A, CREATING ITEM B WITH AN IDENTICAL SYNC HASH**

SERVER1			DEVICE		
ITEM	ServerID	SyncHash	ITEM	Server1-ID	SyncHash
A	SID1	HASH101	A	SID1	HASH101
B	SID2	HASH101			

---

**3. SYNC THE SERVER WITH THE DEVICE. ITEM B NOW SYNC'S DOWN TO THE DEVICE. ALTHOUGH THE SYNC HASH MATCHES AN ITEM ON THE DEVICE, THE ITEM IT MATCHES IS ALREADY SYNCING WITH THE SERVER, SO A NEW ITEM IS CREATED.**

SERVER1			DEVICE		
ITEM	ServerID	SyncHash	ITEM	Server1-ID	SyncHash
A	SID1	HASH101	A	SID1	HASH101
B	SID2	HASH101	B	SID2	HASH101

*Fig. 8*

10/15

---

**1. V1 SERVER SUPPORTS PROPERTIES A & B. V3 SERVER SUPPORTS A, B & Z.**

---

**2. FIRST SYNC WITH V1 SERVER PROPERTIES A & B**

---

**3. SYNC WITH V3 SERVER. ITEM DETECTED AS A DUPLICATE AFTER COMPARING PROPERTIES A & B. SYNC DOWN PROPERTIES A, B, Z.**

---

**4. SQL-CE CHANGE TRACKING ON DEVICE RECORDS A CHANGE ONLY TO PROPERTY Z. WHEN DEVICE NEXT SYNCs WITH V1 IT NOTES A CHANGE TO THE ITEM, BUT NOT IN ANY PROPERTIES IT SYNCs (ONLY Z HAS CHANGED). NO ADDITIONAL SYNC OCCURS.**

*Fig. 10*

11/15

---

**1. ITEM A HAS PREVIOUSLY CROSS-POLLINATED TO HOME PC & WORK SERVER**

---

**2. EDIT TIME ON WORK SERVER**

---

**3. SYNC WITH WORK SERVER**

---

**4. SYNC WITH HOME PC. DEVICE SET TO SERVER WINS. ITEM v1 NOW ON DEVICE.**

---

**5. SYNC WITH WORK SERVER. [NO CONFLICT] ITEM v1 NOW ON WORK SERVER AS WELL.**

*Fig. 11*

12/15

---

**1. ITEM A HAS PREVIOUSLY CROSS-POLLINATED TO HOME PC & WORK SERVER**

---

**2. SYNC KEY 0 AT WORK SERVER**

---

**3. DELETE SERVERIDS FOR WORK SERVER**

---

**4. SYNC DOWN ITEM A FROM WORK SERVER AS AN ADD. ITEM IS DETECTED AS DUPLICATE. HOME PC VERSION IS KEPT.**
